Project Narrative

This project helped 1 landowner within Chippewa County replace previously identified Imminent Health Threat (IHT) Subsurface Sewage Treatment (Septic) Systems. Imminent Health Threat systems are those that are discharging improperly treated human waste onto the ground surface or into surface waters. In addition to the potential water quality impacts, untreated sewage has the potential to introduce bacteria and viruses into the environment. When IHT systems are identified, county or city staff will work with the homeowners on the process required to bring their systems into compliance with the septic ordinance. Low interest loans and grants to low-income households are some of the assistance that is being provided through the Clean Water Fund.

2011 - SSTS Abatement - Chippewa (COUNTY)
FINAL FINANCIAL REPORT
